

CPod™

Spinal VBR System

6 mm

7 mm

8 mm

9 mm

10 mm

⋮

Maximum 35 mm height profile, offered in both tapered and non-tapered styles.

COMPUTER DESIGNED

Comparable to Cortical Bone

The C-Pod implant was computer modeled using FEA analysis tools, permitting the final design to closely match that of cortical bone.

SURGICAL SIMPLICITY

Quick Release Tool

The quick-connect insertion tool eliminates the cumbersome “threaded draw rod” that is typical with competitive products, allowing easy insertion and removal.

CONVEX SURFACES

Conforms to Anatomy

The C-Pod design was computer modeled, allowing the implant to conform to the vertebral body anatomy.

AGGRESSIVE TEETH

Provides Superior Stability

The C-Pod teeth design allows for both initial stability during implantation, as well as long term stability within the interbody space.

“Innovation-by-Ingenuity...
it's our *life's* work.”

IMPLANTS

Non-Tapered

Part No.	Size
