

A solid green square with a white circle cutout on the left side, positioned to the left of the section header.

**ELEGANTLY DESIGNED FOR
MORE INTUITIVE SURGERY**

THE PARAMOUNT PEDICLE SCREW
SYSTEM. EXQUISITELY DESIGNED FOR
THE UNIQUE REQUIREMENTS OF
MINIMALLY INVASIVE SPINE SURGERY.
NO HASSLES. NO HANG-UPS.

- Simplified rod delivery
- Streamlined procedure
- Advanced screw design

KEY FEATURES

SIMPLIFIED ROD DELIVERY

- Integrated screw and rod assembly
- Single-step screw and rod insertion
- Seamless and repeatable rod transfer

STREAMLINED PROCEDURE

- Trouble-free loading of implant and instruments
- Smooth extension locking, unlocking and removal
- Engineered for single- and multi-level procedures

ADVANCED SCREW DESIGN

- Non-cannulated for increased strength, K-wire guided for accurate placement
- 2mm guidewire minimizes kinking and unintended advancement
- Proprietary locking cap threadform enhances lock-down strength and virtually eliminates cross-threading
